

4D Database Overview

This information is presented to assist Bidders in understanding the nature and scope of legacy data to be converted to MAS.

The following pages list the current 4D tables and their data elements. Bidders should understand that the California JPIA is not suggesting that these tables and their relationships be carried forward in MAS. The information is strictly for understanding what currently exists.

Some of the information presented in these tables has recently been moved to a MS SQL Server 2005 database that is integrated with the public facing California JPIA Web site, including the Policy Library and Newsletter tables.

The following table identifies 4D tables, the number of records existing in each (as of June, 2009), and notes to assist in understanding. Please note: All record counts include both active and inactive records. California JPIA has not yet determined if any or all inactive records will be converted to MAS.

4D Table	Records	General Description
Billing	4,410	Should be moved to MS Dynamics GP in the future, with data transfer coming from LMS.
Class Codes		Should be transferred to the LMS, but may be reflected in MAS for analysis purposes.
Contact Job Functions		
Contact Mailing		
Contacts	22,586	All individual contacts (members, non-members, attorney firms, vendors, etc.). This table is used to generate mailings & emails, the membership directory, etc.
Coverage	4,532	Evidence of Coverage letters. Each year approximately 90% of requests result in letters.
Event Attendees		Should be transferred to the LMS, but may be reflected in MAS for analysis purposes.
Event Instructors		Should be transferred to the LMS, but may be reflected in MAS for analysis purposes.
Event Locations	303	Should be transferred to the LMS.
Event Schedule	3,159	Should be transferred to the LMS.
Events	222	Should be transferred to the LMS.
Facilities		Should be transferred to the LMS.
Flyer	1,400	Should be transferred to the LMS.
Incident	621	Members can use an online form to report a “significant” incident. This was intended for liability issues, but Members have been using it for workers’ compensation and property as well.
Instructor	107	Should be transferred to the LMS.

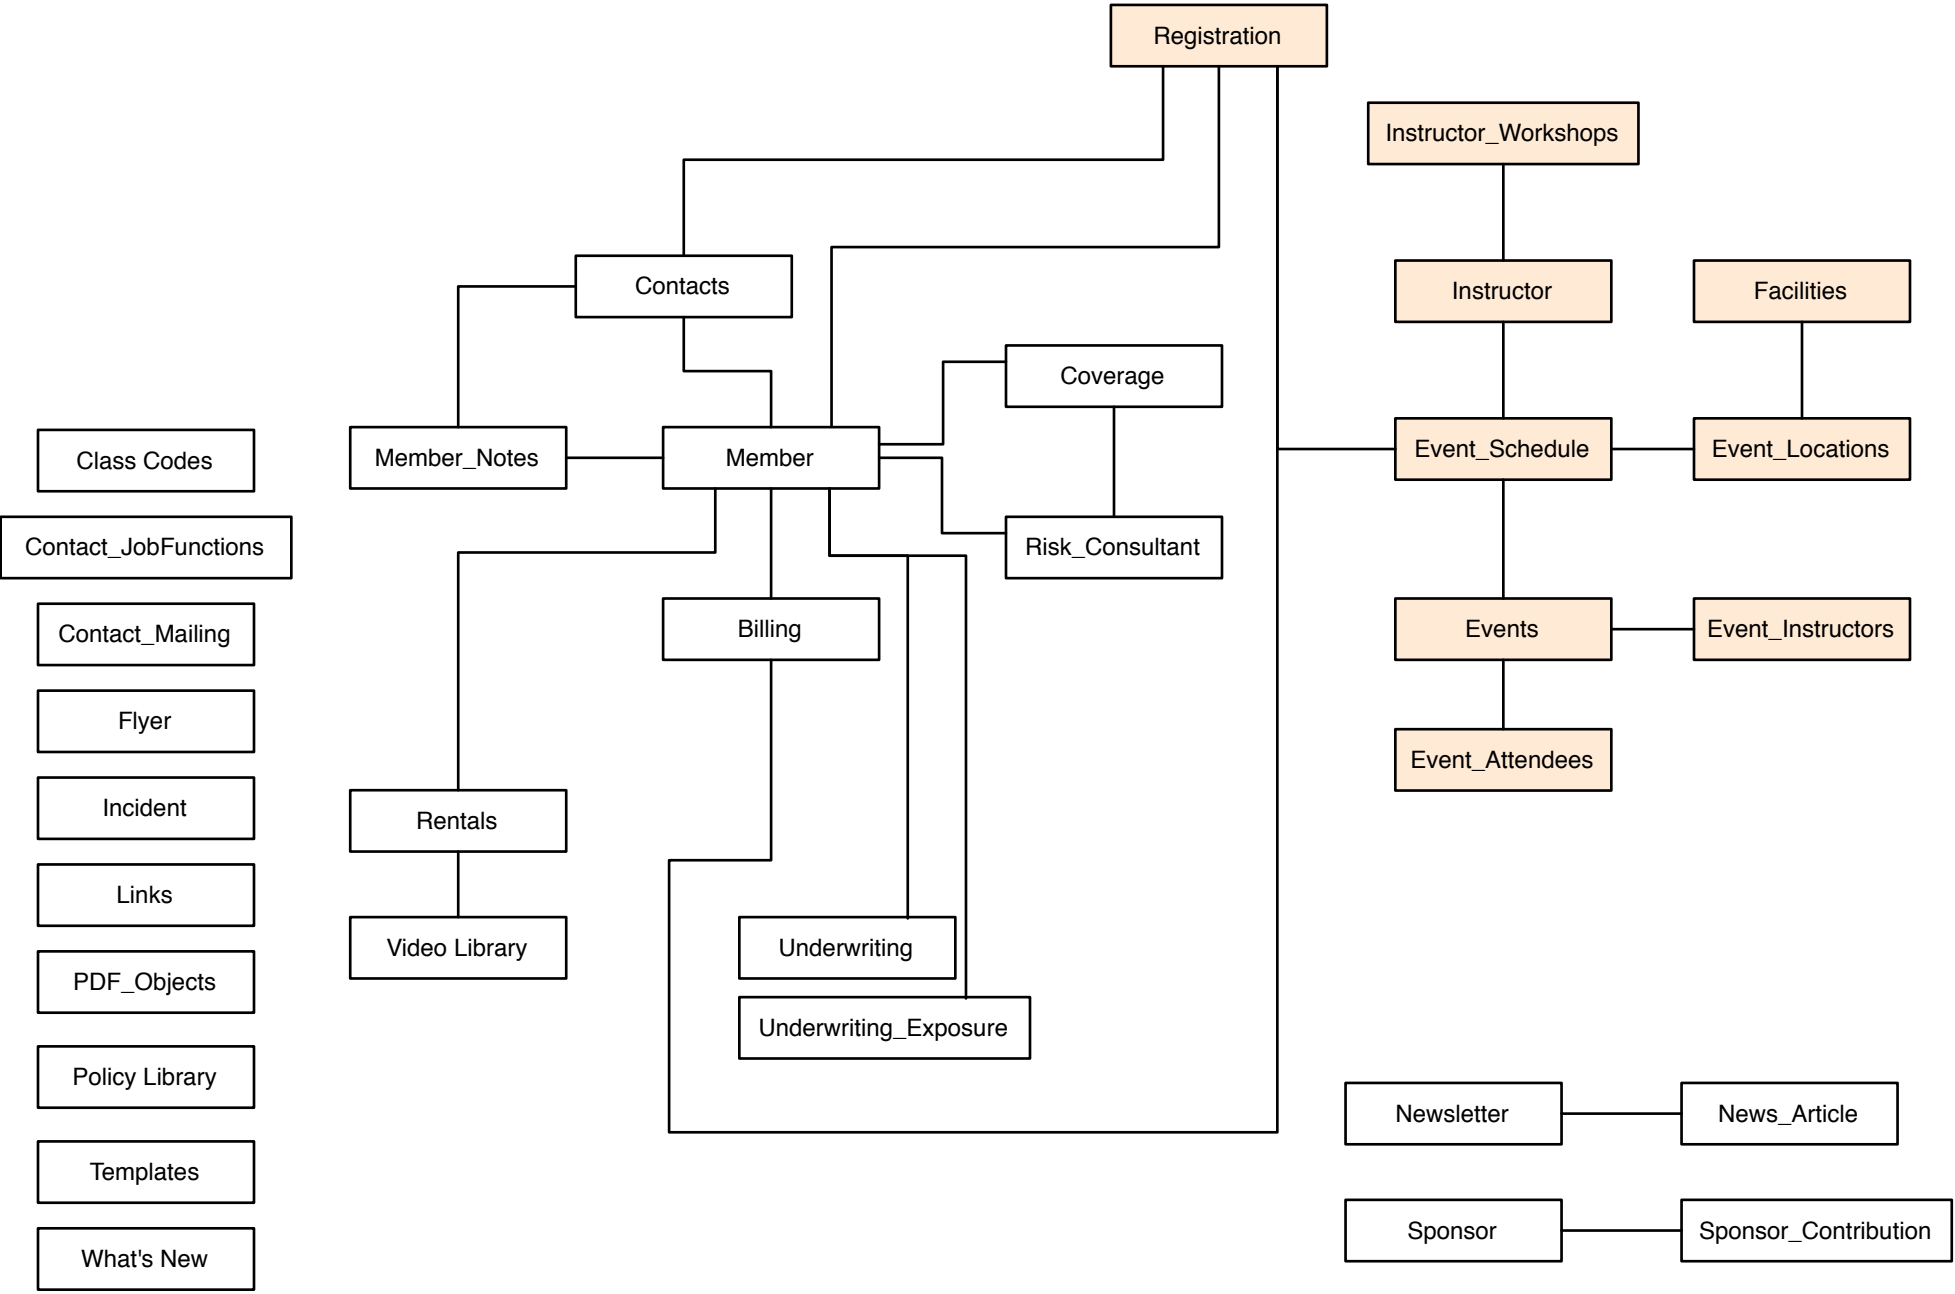

4D Table	Records	General Description
Instructor Workshops		Should be transferred to the LMS, but may be reflected in MAS for analysis purposes.
Links	30	Web site links in this table automatically appear on the “links” page of the Web site.
Member	127	Master record for California JPIA member.
Member Notes		
News Article		
Newsletter	27	Each record has 15-20 sub-records. Placing newsletter articles in this table made them automatically appear on the “newsletters” page of the Web site. Moved to SQL Server
PDF Objects		
Policy Library		Moved to SQL Server.
Policy Library	156	Placing policies in this table made them automatically appear on the “Policies” page of the Web site. Moved to SQL Server.
Registration	80,080	Should be transferred to the LMS.
Rentals	3,050	Individual video “rental” transaction records.
Risk Consultant		Currently not in use.
Sponsor	40	These are the names of the individual sponsors that give donations for our annual risk management conference. This may or may not be transferred to the LMS.
Sponsor Contribution		
Templates	11	Templates for various Evidence of Coverage letters created.
Underwriting	995	A new record is created for each member annually.
Underwriting Exposure		
Video Library	151	Videos/DVDs available to the Members.
What’s New		Currently not in use.

The next page has a diagram that shows basic relationships between the 4D tables. The following pages list the 4D tables and the elements in each.
