

Bloodborne Pathogens / Fire Extinguisher Operation

CALIFORNIA JPIA WORKSHOP DESCRIPTION

This workshop is divided into two one hour sessions. Session one provides participants with information to identify bloodborne pathogens, risks of exposure, and methods of protection. Session one meets the requirements of Cal-OSHA General Industry Safety Orders §5193(5) (c). In session two participants will gain an understanding of basic types of fire extinguishers and their proper use, fire prevention, and response (based on the agency's fire prevention plan and emergency response plan). Hands-on demonstration may be included. Session two meets the requirements of Cal-OSHA General Industry Safety Orders §6151(g)(1). Please note: This workshop is scheduled along with the Hearing Conservation/Heat Stress workshop.

THE FOLLOWING TOPICS WILL BE COVERED

- Identify routes of exposure and exposure prevention
- Acute and chronic health hazards • Reveiw of fire classes
- Fire prevention and response
- Basic types of fire extinguishers and proper use

WHO SHOULD ATTEND

All employees

PRESENTED BY

Steve Damewood, Damewood Consulting Group

Steve Damewood is an independent consultant for both private and public agencies. He has more than 30 years of experience in occupational safety and health. He has served as a safety manager with a local oil refinery and a large construction company.
